

# Messaging Services

## Microsoft Exchange Server 2003

### The Nortec Difference

Established in 1991 and headquartered in the nation's capital, Nortec delivers the highest level Microsoft-based solutions for Identity Management, Security, Messaging, Operational Management, and Data Protection.

Nortec is Microsoft Gold Certified Triple-Competency in Networking Infrastructure, Advanced Infrastructure and Security, and was awarded National Managed VAR (Value-Added Reseller) Partner of the Year in 2004.

Voted #1 Microsoft Enterprise Infrastructure and Security Partner in the DC Metro area, Nortec works with 1 of every 7 Enterprise accounts throughout the Mid-Atlantic, providing a cost-effective alternative to in-house management of technical infrastructures.

### Security

You need to be confident that your business communication is confidential and secure. Exchange 2003 is committed to be secure by design, secure by default, and secure in deployment.

- Utilize Nortec's security assessment to analyze your messaging systems for common spam, intrusion vulnerabilities, and recommended virus protection services
- Protect your IT environment by integrating Microsoft ISA Server as an application-layer firewall into your messaging solution
- Ensure your sensitive emails and documents remain confidential with Rights Management Services

### Availability

When real-time access to communication is critical to the success of your business, Nortec ensures high availability for your messaging services.

- Achieve network stability and flexibility by leveraging the integration of Network Load Balancing and Failover Clusters
- Optimize bandwidth and maximize availability in event of a network outage using redundant paths for Exchange services
- Guarantee quick data recovery with Nortec's managed, off-site Internet backup solution

### Messaging Migration Services

When performing a migration from your legacy messaging platform to Microsoft Exchange Server 2003, Nortec ensures a simple and seamless integration using our proven Exchange Migration Methodology.

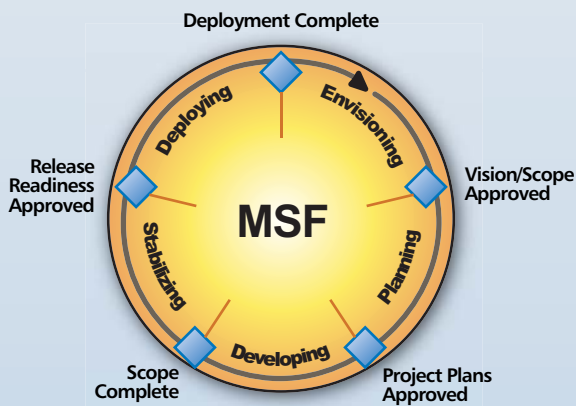

- Assess your existing messaging system (IBM Lotus Notes, Novell GroupWise, Exchange Server 5.5) with the guidance and expertise of Nortec engineers.
- Design an end-state solution that supports your current and future messaging needs.
- Develop and deploy a customized implementation strategy using Nortec's flexible, phased migration options, and effectively manage the pace, cost and risk for your business.
- Realize messaging efficiency, workforce productivity and cost savings by leveraging the benefits of Exchange 2003 and decommissioning your legacy messaging system.

### Mobility

Employees require a mobile solution to stay connected and effective wherever business takes them. Nortec provides premier mobility services utilizing Microsoft's Exchange 2003 and offers solutions that support a mobile workforce with critical business applications. Let Nortec show you the benefits of using mobility services for your business.

- Implement flexible, scalable options for your company's mobile messaging service utilizing Outlook Mobile Access, Outlook Web Access 2003 or RPC over HTTPS
- Improve and increase productivity due to enhanced mobile communication features that allow for anytime, anywhere connection to users on mobile devices (including smart-phone and PDAs) - securely and easily

### Microsoft Solutions Framework

Nortec solutions are delivered through the Microsoft® Solutions Framework (MSF) project management discipline, used by Microsoft to implement their solutions.

The Microsoft® Solutions Framework (MSF) is an adaptable approach for successfully delivering technology solutions faster, with fewer people and less risk, while enabling higher quality results.
